clarai.prod: Table Schema Reference

Catalog: `clarai` | Schema: `prod` | Tables: 9

Table Index

#	Table	Columns	Purpose (from column design)
1	sensor_readings_raw	7	Raw sensor input
2	ingest_watermark	2	Last ingested reading per machine type
3	predictions_history	10	Full history of predictions
4	predictions_latest	10	Latest predictions
5	health_decisions	7	Health decisions per reading
6	alert_candidates	7	Candidate alerts
7	maintenance_advice	6	Maintenance advice
8	thermal_advice	4	Thermal advice
9	pipeline_run_audit	19	Job/task run audit log

1. sensor_readings_raw

Column	Type
sensor_id	string
machine_type	string
reading_time	timestamp
axis	string
peak_accel_g	double
vibration_rms_mm_s	double
temp_c	double

2. ingest_watermark

Column	Type
machine_type	string
last_reading_time	timestamp (truncated in screenshot, assumed)

3. predictions_history

Column	Type
sensor_id	string
machine_type	string
reading_time	timestamp
axis	string
peak_accel_g	double
vibration_rms_mm_s	double

Column	Type
temp_c	double
is_healthy	bigint
model_tag	string
run_id	string

4. predictions_latest

Same schema as predictions_history.

Column	Type
sensor_id	string
machine_type	string
reading_time	timestamp
axis	string
peak_accel_g	double
vibration_rms_mm_s	double
temp_c	double
is_healthy	bigint
model_tag	string
run_id	string

5. health_decisions

Column	Type
sensor_id	string
machine_type	string

Column	Type
reading_time	timestamp
axis	string
is_healthy	bigint
model_tag	string
decision_note	string

6. alert_candidates

Same schema as health_decisions.

Column	Type
sensor_id	string
machine_type	string
reading_time	timestamp
axis	string
is_healthy	bigint
model_tag	string
decision_note	string

7. maintenance_advice

Column	Type
sensor_id	string
machine_type	string
reading_time	timestamp
category	string

Column	Type
advice	string
details	string

8. thermal_advice

Column	Type
sensor_id	string
machine_type	string
reading_time	timestamp
advice	string

9. pipeline_run_audit

Column	Type
workspace_id	string
job_id	string
job_name	string
asset_type	string
job_run_id	string
task_run_id	string
task_key	string
machine_type	string
attempt_number	int
status	string
start_time	timestamp

Column	Type
end_time	timestamp
cluster_id	string
error_message	string
run_page_url	string
task_run_page_url	string
table_name	string
operation	string
conflicting_job_run_id	string
conflicting_run_page_url	string

Common Join Keys

Key	Found in tables
machine_type	1, 2, 3, 4, 5, 6, 7, 8, 9
sensor_id	1, 3, 4, 5, 6, 7, 8
reading_time	1, 3, 4, 5, 6, 7, 8
is_healthy, model_tag	3, 4, 5, 6
